2025 Sri Lanka Online Chinese Project

Admissions Brochure

1. Project Introduction

This project is organized by TTESC and aims to provide a high-quality online Chinese training platform for people in Sri Lanka and around the world who need to learn Chinese. It is suitable for people who use Chinese as a second language for professional learning or use Chinese as a working language for daily use, business exchanges, further studies and tourism in China.

TTESC has cooperated with various universities in China and has brought together a professional and experienced international Chinese teaching team. There are currently six full-time international Chinese teachers who have solid teaching skills, flexible and diverse teaching methods, and advanced teaching techniques. They have successfully trained international students from many countries including Russia, Kazakhstan, Ukraine,

Morocco, Pakistan, Algeria, Mongolia, Lesotho, Zimbabwe, etc and have accumulated extremely rich and diverse valuable experience in teaching Chinese to students from different cultural backgrounds.

TTESC has a relatively complete offline Chinese course system, covering Comprehensive Chinese, Chinese Listening and Speaking, Overview of Chinese Culture, Cross-Cultural Communication, Chinese & Industrial Robots, Chinese & Computer Basics and many other featured courses. Among them, the Comprehensive Chinese online open course is the highlight of the college's teaching. It has been launched simultaneously on the international and domestic versions of the MOOC platform, attracting students from 8 countries in Asia, Europe, America, Africa and other regions to actively join the online learning, forming an international Chinese learning community with multicultural integration and interaction, and has won wide praise and recognition in the field of Chinese teaching around the world.

The course leader, Ms. Hu Huijin, once worked as a Chinese

teacher in the Chinese Program Department of the East Asian Studies at Harvard University in the United States. During this period, she was awarded the Outstanding Teaching Award for her excellent teaching ability and profound cultural heritage. In addition, Ms. Hu has also worked as a part-time Chinese teacher in top domestic universities such as Beijing Language and Culture University, Tsinghua University, and Capital University of Physical Education. During her tenure as a director at Harvard University's Overseas Summer School, she demonstrated outstanding leadership and teaching management wisdom, and successfully organized and implemented a series of high-quality Chinese teaching activities such as the Qingdao Economic and Social Survey Group for American College Students, the Beijing Miyun Rural Development Social Survey Group, and the Beijing 2008 Olympic Social Survey Group, winning unanimous praise and high recognition from teachers and students.

2. Enrollment Plan

Chinese language students: 100-200 students per term, 20 students per class.

3. Course Arrangement

Courses offered : Comprehensive Chinese

Learning format : The teaching method is a combination of online live courses and MOOC self-learning. The online live courses will be taught in real time by experienced Chinese teachers, who will interact with students face to face and answer students' questions in a timely manner to ensure learning results. MOOC provides students with rich self-learning resources. Students can flexibly arrange their study time according to their own learning progress, watch course videos repeatedly, and deepen their understanding and mastery of knowledge points.

Weekly classes

2 hours of online live courses per week to ensure that students can conduct systematic learning and practical exercises under the guidance of teachers. At the same time, students can arrange their own time to study MOOC content. There is no limit on the length of MOOC learning, and students can make full use of fragmented time to deeply learn Chinese knowledge.

Total class hours per semester: 36 class hours

These 36 class hours will cover Chinese phonetics, vocabulary, grammar, Chinese character writing, and daily communication. Through systematic learning and practical training, students will gradually master the basic language skills of Chinese, be able to conduct simple daily communication, and have the ability to further study Chinese.

4. Project Advantages

(1) Excellent Teaching Team

Classes are taught by full time teachers with rich experience in international Chinese teaching. They are not only proficient in Chinese language knowledge, but also have a deep understanding of the learning characteristics and needs of students from different cultural backgrounds. They can teach students in accordance with their aptitude and provide personalized teaching services for each student.

(2) The Course is Highly Comprehensive

Chinese listening, speaking, reading and writing are comprehensively promoted, and others such as China's national conditions and traditional culture are appropriately integrated, making it easier for students to understand China and Chinese culture while learning the language.

(3) Flexible Teaching Format

The teaching mode combining online live course and MOOC breaks the limitation of time and space, allowing students to learn Chinese anytime and anywhere. The real-time interactivity of live courses enables students to get timely guidance and feedback from teachers and solve problems encountered in the learning process, and the autonomous learning of MOOC meets the personalized learning needs of students and improves learning efficiency.

5. Learning Outcomes and Certificates

After completing this program, students will achieve significant results in Chinese language proficiency and cultural cognition. In terms of language proficiency, students will be able to master the basic pronunciation, vocabulary, grammar and common

expressions of Chinese, have certain listening, speaking, reading and writing skills, and be able to conduct simple daily communication and basic business communication. In terms of cultural cognition, students will have a certain understanding of Chinese culture, history, society, and be able to understand the Chinese way of thinking and behavior habits to a certain extent, laying a good foundation for further exchanges and cooperation with China.

TTESC will issue an online Chinese program completion certificate to each student who successfully completes the course.

6. Registration Requirements

(1) Sri Lankan or other nationals who are interested in learning Chinese.

(2) Aged 16 or above, in good health, with no history of major illness.

(3) Have basic online learning conditions and equipment, and be

able to attend online courses and complete learning tasks on time.

(4) Have a strong interest in learning Chinese, have clear learning goals and motivation, and be willing to abide by the rules and regulations of the college.

7. Registration Method

(1) Fill out the Sri Lanka Online Chinese Program Application Form and submit proof of student status.

(2) Send the above materials to the college email address: klpmms@ttesc.org.cn Please indicate "Sri Lanka Online Chinese Program Registration + Applicant's Name" in the email subject.

(3) After receiving the application materials, TTESC will review them and notify the applicants of the results by email within 7 working days. Applicants who pass the review must complete the registration procedures according to the college's requirements.
